

MEHMET BİLAL İNCE

COMPUTER ENGINEER

ABOUT ME

I have completed my undergraduate education in computer engineering on data science and am always eager to learn new information in every field. Being good and creative in my field is my priority. I have been at the computer since childhood. I see software not as my job, but as a part of my life. I trust teamwork and exchange of ideas. I think that I will contribute to my teammates and my company with my unique perspective on engineering problems.

EDUCATION

2029-2031	PRINCETON UNIVERSITY (USA) Computer Engineering / MSc

VOLUNTEERING

AHBAP

- One Donation Hundreds of Lives Project

I took part in the mobile application project where the online donation and blood donation centers are located under the umbrella of the Friends Association, of which I am a member.

LÖSEV

- Patient Information Confidentiality Project

Under the roof of the Lösev Association, of which I am a member, I took on a cyber security task in terms of the confidentiality of our patients' information in web and mobile applications.

AMERICAN RED CROSS

- Emergency Support Project

I took part in this project by developing a mobile application that aims to provide emergency support in case of any disaster under the umbrella of the American Red Cross Society, of which I am a member.

THE NATURE CONSERVANCY

- Stray Animal Tracking Application

Under the umbrella of The Nature Conservancy Association, of which I am a member, I developed a health information inquiry system by attaching chips to animals roaming the streets.
